SIXTEEN OUNCES TO THE POUND

"The fact that a lot of publicity has been given to the conviction and fining of a number of chain store companies and individuals operating group stores in the Ottawa territory is not going to help them in the eyes of the public or those who are backing the Price Spreads and Mass Buying Enquiry," says The Canadian Grocer, "Everyone who operates a grocery store knows how difficult it is always to hand out 16 ounces to the pound. A lot depends on the carefulness with which the staff puts up merchandise and considerable also on the shrinkage. There are some who make sure of the correct weights by checking all parcels put up and weighed for more than a week. There may be a legitimate excuse for short weights as long as there are corresponding overweights given, although this may not always satisfy the magistrate trying the case. In the eyes of some the law is the law and nothing can be done about it. But there can be no excuse for any retailer—chain or individual—consistently passing out to the public parcels of goods that are underweight."

WHAT ALBERTA MOTORISTS PAY

Figures compiled by the Montreal Motorists' League bulletin showing the amount and proportion of taxes paid by motorists in Alberta were impressive. It was stated that since 1929 Alberta collected \$75,724,000 in general revenue of which \$16,918,000 came motor licenses and gasoline taxes. In 1933, it was added, motorists formed 11.4 per cent of the population but in the five year period under review had contributed over 22 per cent of the total provincial revenue.

Stevens vs. Stevens.

The appeal of Levi Gordon Stevens from the judgment of Mr. Justice Ford awarding Florence Stevens the sum of \$50 per month alimony was heard by the five judges of the Appellate Division on Wednesday last. The court was unanimously of the opinion that altho the plaintiff was possessed of considerable property, it was not productive of a great deal of revenue under present farming conditions. They applied the accepted principle that alimony must be paid out of income only and should be from one third to one half of the net income after payment of operating expenses. After going thoroughly into the question of the plaintiff's income, the court by a unanimous verdict reduced the alimony from \$50 per month to \$30, each party being given leave to further apply should the income of the plaintiff change.

Geo. J. Bryan acted for the appellant. S. H. McConaig, of Rutherford, Rutherford & McConaig, acted for respondent.

Celebrating All Hallows.

The pupils at S. P. H. have revived the good old Hallowe'en custom, and are arranging to hold a masquerade party on Wed. Evg. next, October 31, to celebrate the event. A number of invitations for the affair have been sent out.

Another Hallowe'en celebration will be held in town on Friday Evg. Nov. 2 at Kelly's Hall. This one is to be a masquerade dance. Prizes will be given the wearer of the best fancy costume, and to the best comic. Lou Chapin's musicians from Edmonton will be there.

Farmer Has No Protection.

If a farmer signs over his land in his wife's name it is not protected under the [Alberta Debt Adjustment Act] from creditors, as under the Act a farmer must "till the soil," which the wife does not do, it was revealed last week in Supreme Court Chambers. On these grounds Mr. Justice Boyle granted an Order allowing a Wood Creek farmer to require his brother to sell a quarter section of land in payment of the sum of \$997 debt for wages.

Thursday Evening's Picture.

The attraction at the movie-picture house for Thursday Evg., Oct. 25, is to be "The Son-Daughter," in which will be seen Helen Hayes and Kanan Navaro. Assisting these two popular artists are Lewis Stone, Warner Oland, and Ralph Morgan. This picture should prove to be a drawing card as it is well spoken of and has had long runs wherever shown.

Wallace Beery, the famous comedian, assisted by Clark Gable, sure pleased the movie fans who attended the showing of the film "Hell Divers" on Thursday Evg. The antics of these pseudo flyer-mechanics and the rest of the crew were received with delight. The front pictures shown, Travel Talk, depicting scenes in principal cities in Soviet Russia.

Hallowe'en Masquerade
Dance, Kelly's Hall,
Friday, November 2nd.

The "Toll Of The Road"

When is a halt to be called to the ever mounting toll of deaths and serious injuries attributable to automobile accidents.

It is well nigh impossible to pick up a newspaper these days without finding a tragic headline recording one more, or several more, fatalities and to learn that some promising life has been snuffed out or the community has lost the services of some of its outstanding citizens.

If the total of killed and injured in automobile crashes of one kind or another, and from one cause or another, in all countries throughout the world could possibly be ascertained each and every day, and then made public daily, it would perhaps shock the consciousness of most people. The opinion may be ventured that many a war has been fought in which the average daily casualties were not as great as to-day's average "toll of the road."

If the same number of men, women and children were being killed and injured each day and every day in a war being waged on the North American continent, our newspapers, peace societies, churches, governments, would begin to demand that a stop be put to the carnage.

But because the slaughter and suffering is merely the result of automobile accidents, people shrug their shoulders, give expression to some polite words of sympathy, wonder why there should be so many accidents, and then pass on to discuss the price of wheat, the result of the international yacht race, or the outcome of the world's baseball series.

Governments and communities the world over have improved and continue to improve roads and main highways. Hundreds of millions of the taxpayers' money is being spent annually in so doing, while the maintenance of these higher standard highways costs tens of millions more. And the better the roads, the more accidents.

Automobile manufacturers continue to take advantage of these better highways to turn out more powerful and even faster cars. They equip them with better brakes, better tires, safety glass, better devices of every conceivable kind, and then they are turned loose on the highways.

Volumes of laws and regulations are passed to control the operation of these cars and traffic regulations of many kinds are approved and ordered to be enforced. Some of them are; many are not. In fact, without a traffic officer posted every few miles and on every road, complete enforcement of the many laws and regulations is physically and practically impossible. People know this and proceed to ignore laws and regulations enacted for the protection of themselves as well as other people.

Glaring headlights which blind the driver of an oncoming car; only one headlight burning; no rear light; overtaking and passing and then cutting in ahead of another car and doing so at a high rate of speed; tearing up an incline in entire ignorance of the fact that another car may be mounting the other side; dashing in from a side road on to a main highway without stopping or slackening speed; operating cars with defective brakes—but why continue the enumeration? These and many other violations of law and regulations are daily sending people to their deaths or to live on, helpless, suffering cripples.

When is it going to stop? How is it going to be stopped? Or have people become so reckless and so callous of death and suffering, and so careless of the rights of others, that they are quite satisfied that the "toll of the road" should go on mounting higher and higher?

The passing of even more stringent laws will not stop it, although they might prove, for a time at least, a greater preventive. The better enforcement of existing laws and regulations would help, especially if the penalties for violation of them were made much more severe. More and still more education of the people would ultimately bring some results. But in the final analysis there is only one way in which this black blot on our present-day civilization can be removed. The individual citizen must himself do it. Education, laws, law enforcement alone will never accomplish it. It is that strong, almost all-powerful Human Factor, which so many people to-day are inclined to ignore in the realms of society, economic and in relation to all public policies and acts, which constitutes the weak link in the chain of public conduct and public relationships.

Individuals must take this great problem in hand. They must not only understand and obey the law themselves, but whether they like to do so or not they must individually become guardians of the public weal and take an active part in solving the problem, rather than maintain a merely academic interest in it, saying "Let George do it" and relying on law and policemen to do what law and policemen alone can never do.

SUNDAY SCHOOL LESSON

OCTOBER 28

THE CHRISTIAN'S STANDARD OF LIFE

Golden text: "And be not drunken with wine, wherein is riot, but be filled with the Spirit." Ephesians 5:18. Lesson: Ephesians 4:17-5:21. Devotional reading: Colossians 3:12-17.

—Explanations And Comments—

The Old Man: the Unbelieving Gentile, 4:17-19. In these verses Paul warns his readers against the life of non-Christians. His opening words, "This I say therefore and testify in the Lord," remind one of Christ's words, "Verily I say unto you," having the same solemn force as the latter, calling attention to the weightiness of the words that are to follow, to the importance of his readers' hearing and heeding. And the exhortation is, "that ye no longer walk as the Gentiles also walk." Paul is warning of being influenced by their evil ways, and therefore Paul earnestly warns them against a relapse.

Do not live as they do, he urges; they are without intelligence, without God, their consciences are hardened into callousness, they have given themselves over to the grossest sensuality.

The New Man: Believing Gentile, 4:20-24. Paul now tells his readers that, unlike the Gentiles of whom he had been speaking, they had learned the true teachings of Christ. "If so be that ye heard him and were taught in him," did not imply any doubt as to the fact. The clauses rather intimate that these things can be taken for granted. "If so be" may be rendered, "as it may be assumed that Christ was the sum and substance of the message ye received, and that after accepting him ye were instructed in vital fellowship with him." The manner and character of this instruction is further defined as being "even as truth as in Christ." In the historical Christ, in Jesus of Nazareth, are embodied the true standards of living virtues, the motives, the purity, the holiness, which his followers are expected to accept, to assume, to reproduce. The Christ of the Gospel is in the fullest sense the way, and the truth, and the life." (Charles R. Erdman).

"But put away the old man," their old selves, with all the vanities and vices which they had before they knew Christ, and being "renewed in the Spirit of their minds," must put on "the new man," the new selves, "that after God hath been created in righteousness and holiness and truth."

SOUR STOMACH, GAS

"I could not enjoy a meal, because of the bad after-effects—sour stomach, gas and indigestion. I lost weight, became nervous and sleepless," said Wm. Fashington, 49, Hamilton, Ont. "I took Dr. Pierce's Golden Medical Discovery and my digestion is better. I enjoyed my meals, and I feel so much better."

Woman Dispatches 'Planes

Looks After Passengers And Mail In

All Weather

The aeroplane dispatcher at Concord, New Hampshire, airport is a woman, Mrs. Alice L. Marston.

Four times daily a tri-motored passenger, mail or express aeroplane alights there, and whether it be 35 below zero, as it was once last winter, or 90 in the shade, as it was more than once this summer, passengers are greeted by a trim, diminutive lady who meticulously takes their tickets, assists them to alight and then tosses the mail bags on board or takes them off.

Record 'Phone Call

A two-way conversation through an ordinary French-type telephone receiver installed in an automobile, was successfully completed for what General Electric Company engineers at Schenectady, N.Y., said the first time, when they exchanged greetings with Sydney, Australia, 10,000 miles away.

Canada was the largest supplier of fertilizers to Southern Rhodesia in 1945 and she was also the third principle supplier of foodstuffs during the same period.

Wider Distribution of Good Seed Is a Prime Essential In Putting Farming Back On Paying Basis

One of the improvements most to be desired in Canadian agriculture is a reduction in the number of varieties in use of cereals and other farm crops, and the more careful selection and better cleaning and grading of the seed of the best varieties.

A small per centage of farmers who make use of the best varieties make use also of the best seed cleaning methods, with the result that the seed which they sow is in all particulars superior to the seed used by their neighbors, and it is scripturally and actually true that as they sow, so they reap. Their crops are likewise superior.

On the other hand it is true that many are unable to select the variety of the wheat, oats or other important crop they are growing. This is equivalent to saying that they do not know whether it is good, poor or indifferent seed in quality. Other farmers, again, are familiar enough with the variety names of their crops but have been misled on the subject of the merit of any particular variety, and may be prizeing highly one which is not the best adapted to their particular locality or which perhaps is of inferior quality when grown. Failure to compare carefully the merits of the different varieties and to choose the variety in each crop which under the prevailing local conditions combines both high yield and good quality is a misfortune, first from the standpoint of returns to the individual grower and secondly from that of the nation's total production.

Unfortunately, too, are the results from using seed which is not pure as to kind and variety. There are many instances where one kind of grain has been so contaminated with another, or one variety has been so mixed with one or more other varieties of the same kind, that the resulting crop has been unproductive and has suffered serious deterioration in market value. Differences in varieties as to time of ripening, colour, size and shape of kernel, and in milling and feeding quality, emphasize the desirability of keeping each variety as pure as possible.

Fortunately there are to-day in every province of Canada individual growers and societies of farmers who are specializing in the production of Registered, Certified or Improved No. 1 seed of the commoner agricultural crops. Their efforts in improved seed production, and the distribution of their product among other growers are being encouraged by both the federal and provincial Departments of Agriculture.

An Unusual Traffic Problem

Rickshaw Men In Pelting Wanted To Cut Corners

Conservation was caused among Pelping's 30,000 rickshaw men recently when a new regulation forced them to go around intersectional traffic signs instead of cutting across the shortest route. They have hitherto been permitted to do. They readily understood that a motorcar should observe such a rule, but could not conceive of any sensible person going farther than was necessary on foot. As most rickshaw pullers are so illiterate that they cannot read even the simplest regulations, traffic policemen sweated for days trying to explain verbally the logic of taking the long way round a corner, and in untangling the traffic line-up which resulted from the frequent arguments. White directional arrows on asphalt street corners helped considerably, but on unpaved streets confusion continued for a week.

Two Russians, who recently scaled Avach, a volcano 8,160 feet high, in Kachatta, crossed a barrier of snow and found the fiery crater, 450 to 600 feet deep and a mile in circumference.

There is a world surplus of nubs and fats.

The most fatal of all lethal weapons is the unloving eye.

Barbarians Advised

Had Signs Over Caves Telling About Axes And Clubs

In the course of an interesting address on "Advertising" to his fellow-members, Harold Vanderlinder, secretary of the Walkesbury, Ontario, Kiwanis Club, declared that "the newspapers are the greatest medium of advertising in the world. Mr. Vanderlinder took his listeners back to the cave-man period, when advertising was first introduced by the barbarians with signs over their caves, advertising their stone axes and hammers and clubs. The same form of colored-pole advertising as is now still used by barbers was employed by the Roman tonsorial artists he said.

By Ruth Rogers

BUTTONS TRIP DOWN BACK OF SMARTEST DRESSES THIS SEASON—SUCH A YOUTHFUL MODEL!

Here's a charming little dress done in black novelty jersey, a sporty type for general daytime occasions. A white bengaline collar completes this youthful costume. The buttons are black bone.

For "back-to-college" a gay angora plaid in red and grey is jaunty with white starched linen collar and red bone buttons. Make the collar detachable so it can be easily removed for laundering.

Materials such as cotton crepe, satin crepe, maroon crepe, novelty rayon that suggests wool, etc., are also suitable mediums.

Style No. 729 is designed for sizes 14, 16, 18 years, 36, 38 and 40 inches bust.

Size 16 requires 3 1/2 yards of 36-inch material with 3/4 yard of 36-inch contrasting material.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

WHAT DOES YOUR HANDWRITING REVEAL?

By LAWRENCE HIBBERT (Grapho-Analyst) (All Rights Reserved)

(Editor's Note: Interest is increasing in these articles on Character from Handwriting. Many readers are taking advantage of the authors offer to give them a personal reading of their own writing. If you want your handwriting analyzed, read the advertisement at the foot of this article.)

I mentioned in an earlier article that a handwriting expert—a Grapho-Analyst—is not a magician. He is not one who, by waving a magic wand, can transfigure you. He cannot, by the mere expression of certain weaknesses in your character, change those weaknesses into strong chains of character.

A Grapho-Analyst's position is that of an adviser. He can dissect your character and your talents; he can probe your nature and put his finger on the weak points, and he can delineate the good traits that you have.

It is up to the "patient" whether or not he acts on the suggestions of the Grapho-Analyst. If you go to a doctor, and he makes certain suggestions for treatment, based on his diagnosis of your case, it is up to you whether you follow out his advice.

So with the Grapho-Analyst. This science of reading character from handwriting will be of tremendous help to you and will, if you follow out the advice that is given you, based on your handwriting, be of incalculable value to you.

Various correspondents have asked certain questions. Some of these have already been mentioned in my previous articles, but it will be worth while reiterating one or two of them. Because in any consideration of the value of Grapho-Analysis, these facts must be borne in mind.

Can handwriting tell sex? No, it cannot. We all know of women who have very strong qualities and virile personalities—who act like men are commonly supposed to act. And these women write like men. This is because there are certain definite masculine qualities—aggressiveness, for example. This shows in the writing.

And some men are very effeminate. They write like many women. And these characteristics show up in their writing. But it is not possible to lay it down as a basic law, that sex can be shown from handwriting.

Is it possible to diagnose ailments and disease from handwriting? There are certain diseases, as heart trouble, for instance, which can be diagnosed from handwriting. But this angle of Grapho-Analysis is merely in the early experimental stages.

Nothing definite or scientific can be laid down in this matter, at the present time, and for that reason, Grapho-Analysts do not attempt to inform questioners as to their specific ailments.

Grapho-Analysis is a scientific delineation of character and talents from handwriting, and as such, it is of tremendous value to you. It is definite and unassailable on these points, and in that regard can exercise a tremendous power for good.

Do you want to know the traits of character that your handwriting reveals? A personal analysis may be the means of saving your whole future. And do you wish to know the secret characteristics of your friends? Send specimens of the writing you want analyzed, and enclose 10c coin for each. Send with 3c stamped addressed envelope, to: Lawrence Hibbert, care of Winnipeg Newspaper Union, 175 McDermott Ave., Winnipeg, Man. Letters are confidential and will be answered as soon as possible, but please allow about two weeks for your reply.

More than 200 greyhound racing tracks are in operation in England.

SAVED FROM CHINESE BANDITS

Our picture shows (centre and right), Mr. R. Lury and Mr. E. P. Johansen, officials of the Metro-Goldwyn Pines Corporation, photographed after their rescue from bandits who wrecked a train in Manchukuo and kidnapped them. The bandits were located on an island by an aeroplane.

Scientists Discover How To Convert Wood Into Glucose. The Fundamental Of All Foods

The eye of scientists are on a little factory which has just been opened at Mannheim-Itheimau in Germany.

This factory has been built with the support of the Nazi government. One of the scientists responsible for it is a Lancashire professor.

Lorry loads of wood are going into it, and are being transformed by intricate chemical processes into some of the essential foods of life.

It means that it will be impossible in future for any country with timber to be starved out in time of war.

The timber is turned by dilute acid treatment into sugar—not ordinary sugar, but glucose, the fundamental of all foods.

Glucose can be converted easily into yeast, foodstuffs, alcohol, resin, glycerine—for nitro-glycerine explosives—and a hundred other things.

Already the work is on a commercial scale, and millions of acres of European land, which are regarded as useless except for timber, now become of equal economic importance with cultivated farm lands.

The chemists responsible for this discovery are Dr. Friedrich Bergius, a German scientist, and Dr. W. R. Ormandy, a research chemist from Wigan, Lancashire, who is now living in London.

Dr. Bergius has been working on the scheme for 15 years. Dr. Ormandy joined him 10 years ago.

British firms who have been supporting Dr. Bergius and Dr. Ormandy in their research will share in the benefits of the discovery.

There are 3,000,000 acres of woodland in Britain. The state controls 300,000 acres, and the other 2,700,000 acres are private property.

Britain, according to the latest figures, has only 1,580,000 acres of land under oats—less than half the woodland acreage.

This means that Britain, if equipped with these factories, could draw

as 3,000,000 extra acres of land for a food supply in time of emergency.

Dr. Ormandy said: "Germany realizes the importance of this discovery because of her experiences during the war."

"This had to serve her population to provide material for explosives."

"But now things are different, and that is what Hitler meant when he said recently: 'German scientists with German materials are going to make Germany an independent nation.'"

"Every year on every acre of forest land nearly the same amount of digestible cellulose and other carbohydrate foods are produced as on an acre of land under oats."

"Only about half of the available wood can be used as timber, and it became obvious to us that there was an enormous source of raw material for the production of foodstuffs at the disposal of mankind if only we could find a technical process to transform it into glucose."

"We soon discovered how to make alcohol from wood."

"We then found out how to produce a digestible sugar which can be used as human food directly in the form of pure glucose, or indirectly in the form of a cattle food."

"The production of yeast followed quickly."

"The factory at Rheinau is now capable of producing each year more than 100,000 tons of pure carbohydrates for food."

"The discovery is as important a factor in guaranteeing an independent food supply as the coal hydro-generation process is in guaranteeing independence from supplies of foreign oil."

A reporter tasted some glucose. It is like sherbet, but is sweeter and less effervescent.

Two tablespoonsful are said by chemists to be equal in food value to a whole meal.

Would Reduce Street Noises

Italy May Make Autoists Drive Without Using Horns

As a result of recent tests, Italy is considering the abolition of street noises by forbidding the use of automobile horns. This silent regime has already been employed at night in England with success.

Every Italian automobile operator "drives with his horn," resulting in a bedlam of noise unequalled in any other country. All taxis and most private cars are equipped both with electric horns and the old-fashioned horns with rubber bulbs.

At present all honking has to cease for the night at 11 p.m. to give citizens some chance to sleep. Recently a "week of silence" was tried out in Milan and there was not a single accident. Now it is planned to ban horns altogether throughout the country.

Sir Kingsley Wood, British postmaster-general, told the advertising convention at Leicester he attributed much of the recent record increases in the business of the British post-office to extensive and consistent advertising.

Canada Not Infested

By Japanese Beetle

Traps Set But No Sign Of Destructive Pests Found

No signs of infestation by the Japanese beetle, which has been doing serious damage to trees, shrubs, flowers, fruits, vegetables and lawns in the northeastern states, have been found in Canada.

Early in July of this year, Japanese beetle traps, in which were placed geraniol and eugenol, two essential oils used in perfumery, to which it has been found the beetles are strongly attracted, were distributed in the Niagara Peninsula, Toronto, Montreal, Saint John, N.B., and Yarmouth, N.S. districts. The traps were distributed to determine whether the beetle had invaded Canada but none have been caught in any of the traps. The trapping activities attracted considerable attention from the public.

Many persons submitted insects to the Entomological Branch and to Entomological Inspectors who were thought to be the Japanese beetle, but none of the insects proved to be such. The Japanese beetle was first found on this side of the world during the summer of 1916 at Philadelphia, Pa., and since then it has multiplied and spread in the north eastern part of the United States and has been discovered at several points not far from the International Boundary. It is one of the most destructive of foreign insects. The co-operation and assistance of the public is appreciated by the Dominion Entomologist and his staff.

Would Not Like It

Prince Of Wales Knew Lots About His "Great-Granny"

"Are there any kings and queens in Heaven, or when you are an angel is everybody equal?" asked the present Prince of Wales when, as a child of seven, his portrait was being painted by Mrs. Gertrude Massey, the well-known artist in miniature.

Mrs. Massey replied that all were equal in Heaven. "I think that is quite right, but great-granny won't like it," replied the Prince. "Great-granny" was Queen Victoria.

It dissolves clogging grease—never harms the plumbing

WHY be annoyed by stopped-up drains? It's so easy to keep them clear and free-running. Simply sprinkle Gillett's Pure Flake Lye down each week. Use it full strength—it will not in any way harm the enamel or plumbing. It cuts right through all clogging matter . . . kills germs and destroys odors.

It's easy to be your own plumber this workless way, and you've no unwelcome bills to pay afterwards! Get a tin of Gillett's Lye from your grocer today. It will save you hours of unnecessary scrubbing and rubbing all over the house.

Never dissolve lye in hot water. The action of the lye itself heats the water.

FREE BOOKLET. The new edition of the Gillett's Lye Booklet gives dozens of practical hints for saving time and work with this powerful cleanser and disinfectant; also contains full directions for soap making, thorough cleansing and other uses on the farm. Address Standard Brands Limited, Fraser Avenue & Liberty Street, Toronto, Ontario.

GILLETT'S LYE EATS DIRT

Customers of fashionable shops of London may now be photographed in gowns and jewelry they think of purchasing and make their final choice after studying the prints.

"Blue" Spells

Reduce those women to the pearly shadow of their own smiling selves. Others take the Vegetable Compound when they feel the "blues" coming on. It steadies quivering nerves . . . helps to tune up the general health . . . gives them more pep . . . more charm.

WORLD HAPPENINGS BRIEFLY TOLD

A civic lottery to help raise funds necessary for administration of the city's finances has been mooted by Mayor Camillien Houde of Montreal.

To preserve peace, the world needs a "heart trust," as opposed to a "brain trust," Hon. Yotaro Sugimuru, Japanese ambassador to Italy, contends.

Drastic punishment will be meted out to all minors caught smoking cigarettes on the streets of Nanking, according to orders just issued by Mayor Shih Ying.

Carrying 4,048,877 bushels of wheat to the markets of Europe, chiefly Great Britain, 15 vessels cleared from the Hudson Bay port of Churchill, Man., during the 1934 navigation season.

H. E. Sellers of Winnipeg was re-elected president and all officers and directors returned to office at the annual general meeting of the Alberta Pacific Grain Company, Limited, at Calgary.

The Dominion treasury now holds gold to the value of \$72,357,276, which is \$16,807,450 in excess of statutory requirements, a report of the finance department, issued at Ottawa, says. Against this gold there are notes in circulation to the amount of \$207,063,548.

Little Journeys In Science

COAL

(By Gordon H. Guest, M.A.)

A century ago, the great British statesman, Sir Robert Peel, said that the future belonged to the nation which could produce the most coal. Certainly the importance of coal cannot be over-estimated, and there is little doubt that the sudden curtailment of the world's coal supply would be an unbearable blow to our civilization. In transportation, manufacturing, and for heating it is widely used, and the production of the mighty tools of man, iron and steel, depend upon it.

Coal is known to the scientist as a carbonaceous mineral, because carbon is a fundamental part of its structure. Formed from the luxuriant vegetable growth of early geographical ages, it is the product of the slow decomposition of these materials in a limited amount of air. Geologists tell us that the conditions most favourable to its formation are found in fresh-water lakes bordered by flat, marshy land, on which an abundance of vegetation grows. The plants grow, decay, and grow again, pushing their way out into the lake and gradually building up on the bed a mass of peat, which is the first stage in the development of coal. Gradually the mass hardens first forming lignite or "brown" coal. As hundreds of thousands of years pass, the layers of peat are buried by masses of clay and sand which harden into rock, and which through the heat, pressure, and chemical action in the soil become first bituminous and then anthracite, or hard coal.

It is estimated that the coal which is now being taken from mines, was deposited forty million to one hundred and fifty million years ago. Fifteen thousand million tons of coal are mined each year, and it is said that at the present rate of consumption, the earth's coal supply will be exhausted in five thousand years.

THAT DEPRESSED FEELING IS LARGELY LIVER

Wake up your Liver Bile

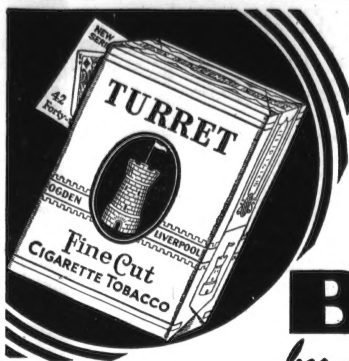

—Without Calomel

You see "feeling punk" simply because your liver isn't pouring its full quota of liquid bile into your bowels. Digestion and elimination are both hampered, and your entire system is being poisoned. What you need is a liver stimulant. Something that goes farther than salts, mineral water, oil, laxative candy or cathartic pills, and which only moves the bowels—ignoring the real cause of trouble, your liver. Take Carter's Little Liver Pills. Purely vegetable. No harsh mineral matter. See the Sun. Ask for them by name. Before substituting, see at all druggists.

No Undue Rush

During 1901 a Sanitary District in Chicago was sued by a construction company. Recently the case was finally wiped from the court docket because of the failure of the complainant to prosecute. At least it can be said that the court did not act hurriedly, or in a manner that in any way deprived the plaintiff of his civil rights.

Canada supplied Malta in 1933 with over \$360,000 worth of goods, mostly wheat and flour. The imports from Malta to Canada for the same year totalled \$130.

Planet Yields X-Rays

University Of California Believes

New Source Of Radiation Found

X-rays from mercury, an entirely new source of such radiation, are announced from the University of California. The discovery that mercury will produce X-rays was the outgrowth of a new type of high power

vacuum tube with voltages not hitherto available to science. The process was described in the physical review by Wesley M. Coates and David H. Sloan of the University's radiation laboratory, department of physics. The rays cover a wide variety, from "soft", that is with small penetrating power, to "hard" rays that drive deeply into solid sub-

stances. The "targets" upon which the mercury beams were smashed include aluminum, sulphur, bromine, molybdenum, silver, tin and lead.

The history of China goes back to the year 2205 B.C.

The dog population of London is estimated at approximately 500,000.

TELL YOU HOW TO COOK 3 VEGETABLES AT ONCE IN THE SAME SAUCEPAN

with no odor . . . less cost . . . better results

Place each in its own bag made from Canapar Cookery Parchment. You seal in all the mineral salts and flavor, this way . . . and there's no odor, not even from cabbage or cauliflower. You need only use ONE burner—turned low.

And vegetables are only one food that can be cooked better with Canapar. For instance, when boiling or steaming fish, all the goodness and flavor are retained—and there's no odor—no sticky pots and pans to scour. This alone makes Canapar worth using.

Remember that Canapar won't absorb odors. You rinse it off—hang it up to dry and use it repeatedly. Try it as a dish cloth, especially for glasses—it does not shed lint.

WHEAT POOL WILL PAY DEBT TO MANITOBA

Winnipeg.—Assurance indebtedness of the Manitoba Pool Elevators, Ltd., to the Manitoba government would be paid in full was made by Paul F. Brett, Kennan, Man., president, in the directors' report submitted to the annual meeting of the pool organization.

"The progress made in the last three years, despite light crops, is a very definite indication that the Manitoba Pool Elevators will be able to meet its obligations to the government," said Mr. Brett. "There need be no anxiety on the part of taxpayers generally that any loss will be occasioned by its operations."

The report showed a net operating surplus of \$30,046. Payments of \$154,972 due the government this year had been met in full and the \$48,768 unpaid last year was paid this year. The indebtedness of the pool to the government, totalling \$2,100,000 when the pool was reorganized in 1931, has been reduced to \$1,649,402 at present. The balance of the operating surplus, approximately \$125,000, was added to the reserve account.

A payment of about \$60,000 had been made to the Saskatchewan and Alberta pools on terminal No. 1 at Port Arthur. This plant was estimated to be worth \$50,000 and three remained approximately \$280,000 to be paid the two sister organizations within seven years.

"When reorganization took place in 1931," continued the report, "Manitoba Pool Elevators, Limited, owed the Manitoba government \$2,100,000. This had been reduced to \$1,649,402."

"The progress made despite light crops in Manitoba the last three years is a very definite indication they will be able to meet their obligations to the government in the future, and there need be no anxiety on the part of the taxpayers generally, that any loss will be occasioned thereby."

No War Spirit

General Smuts Does Not Think World Is On Verge Of Another Conflict

Dundee, Scotland.—"I do not agree with those who think the world is on the verge of another great war," declared General Jan C. Smuts, empire statesman, who played a leading part in the last conflict, as he delivered his farewell address to the University of St. Andrews.

General Smuts, noted soldier and scientist, former prime minister of South Africa, has been rector for the past three years of the 500-year-old university, but this is the first occasion on which he has been able to be present for induction. His term expires in a few months.

Scaremongers were doing their best to create an atmosphere of war, but despite them, and the present lamentable failure of disarmament efforts, and despite the vogue of "silly drilling and strutting about in uniform," he said, "I do not find real war nearer anywhere."

For Better Films

National Council Of Women Deplores Low Standards

Ottawa.—With the declaration that "low standards in the motion picture field have a direct relationship to juvenile delinquency and crime," the National Council of Women lined up in support of measures to clean up the pictures.

The council carried unanimously the following resolution:

"Realizing the powerful influence of the cinema in moulding and educating public opinion;

"Realizing too the fact low standards in the motion picture field have a direct relationship to juvenile delinquency and crime;

"The National Council of Women in annual meeting assembled, would therefore strongly urge all its federations, local, provincial and national, to lend their support to efforts being made at the present time to secure a production of pictures which would assist in character development and provide a medium of wholesome recreation."

A resolution which deplored "the increasing tendency of the Remembrance Day services in many parts of Canada to be a military pageant and a diplomatic ceremonial," evoked discussion but was referred to the committee of the League of Nations committee so it may go to local councils for expression of their opinions thereon.

Sell Lands Too Cheap

Criticism Of Disposal Of Alberta Lands By Federal Government

Ottawa.—The Dominion government was criticized for disposing of Alberta farm land, either by giving it away to settlers or selling at \$5 per acre when as much as \$25 per acre was being realized on similar areas. M. M. Porter, counsel for Alberta, appearing before the natural resources commission, was arguing the claim of that province for compensation for alienation by the Dominion government of 25,000,000 acres of western land.

Mr. Porter quoted extensively from sales records between 1908 and 1930 to support his claim the lands could have been profitably disposed of.

A number of maps were filed in an attempt to show lands situated in closely-occupied areas, with land prices of from \$5 to \$25 prevailing, were by the act of 1930 either given away for nothing as homesteads, or sold at \$3 per acre as purchased homesteads or pre-emption.

Makes Quick Recovery

Warsaw, Poland.—The paralysis which kept Peter Milewicz motionless for 30 years took a sudden turn for the better—too sudden for a couple of weeks to be robbers. When the robbers stalked into the paralytic's home in the village of Morkenski, near Wilno, the invalid suddenly vaulted out of bed, grabbed a gun, and began to fire away at the startled marauders, who promptly fled.

Miners In Hospital

Pecs, Hungary.—From many parts of the world came messages of sympathy and encouragement for the 1,260 miners who remained on a five-day underground hunger strike in the village of Morkenski, near Wilno, the invalid suddenly vaulted out of bed, grabbed a gun, and began to fire away at the startled marauders, who promptly fled.

Ask Addition To Agenda

Vancouver.—British Columbia has suggested that the question of responsibility for unemployment be added to the agenda laid down by Prime Minister R. B. Bennett for the impending conference of premiers on premier constitutional amendments, Premier T. D. Pattullo stated.

To Make Return Flight

Dublin.—Lieutenant Cesare Sabelli, who crashed in Ireland with Captain George Pond on a recent unsuccessful non-stop flight from New York to Rome, arrived here recently, saying he planned a return flight from Ireland to North America.

For Water Survey

Winnipeg.—Appointment of a Dominion government commission to investigate means of water conservation, in southwest Manitoba was urged here by Mayor Ralph H. Webb, upon his return from an inspection trip in that area.

HON. W. J. PATTERSON

Minister of Telephones in Saskatchewan, who announced that the Provincial Government has leased telephone circuits to interested parties for use for broadcasting, telephone communication or for telegraphic use.

Winnipeg To London By Air

Western Flyers Vision Regular Schedule To Be Covered In 48 Hours

Winnipeg.—Winnipeg to London by air in less than 48 hours and on a regular schedule is the plan of a group of local flyers revealed here.

Roy Brown, Ted Stull, Milton Ashton and Jack Moss, four men prominent in flying in northern Canada who combine more than 25,000 hours of flying experience, are convinced of the feasibility of such a project and see in the "northern route" the basis of a daily air service with the Old Country.

The route they have studied lies on almost a direct west to east line from Winnipeg to the Faroe Islands and then south to the northernmost tip of Scotland. It crosses Hudson Bay, Baffin Land, Greenland, and Iceland.

"This proposed service would not be a bit of a misadventure," declared Mr. Moss. Air conditions, communication bases and type of equipment had all been closely studied, he continued, and he was convinced there would be a regular air service within two years.

Would Abolish Ratio System

Japanese Delegate To Tri-Power Naval Conversation States Position

London.—Admiral Isoroku Yamamoto, Japanese delegate to tri-power naval conversations here, said flatly Japan will demand abolition of the ratio system of limiting naval armaments.

Instead, he revealed, the island empire will seek to substitute the global tonnage basis.

These proposals will be made to representatives of the United States and Great Britain in the course of talks scheduled to start here next week.

Yamamoto's announcement came soon after authoritative sources had disclosed the Americans, Norman H. Davis and Rear Admiral William H. Standley, will suggest substantial reduction in general naval armaments and renewal of the Washington and London naval treaties.

Grain Smugglers Arrested

U.S. Farmers And Farm Laborers Have Admitted Guilt

Fargo, N.D.—Fourteen Townier county farmers and farm laborers, alleged by the government to have smuggled thousands of bushels of Canadian wheat into the United States and sold it, pleaded guilty in United States district court before Judge Andrew Miller.

Passing of sentence was deferred at the request of P. W. Lanier, United States district attorney, until the Grand Forks term of court which opens Oct. 23.

Those in court were charged either with directly hauling the wheat to American markets or with conspiracy in connection with the delivering of the wheat to others who marketed it.

Arrest of Thomas C. Wildish, Ellsberg elevator man, alleged by the government to be one of the key figures in the smuggling, was announced a few hours before the 14 Townier residents appeared for arraignment.

Winnipeg.—Demand in the United States for soft grains for making macaroni is increasing because of underlying the smuggling of wheat from Canada across the international boundary into the United States.

Failed To Take Precautions

King Alexander Lost Life Because He Did Not Wear Bullet Proof Vest

Belgrade.—King Alexander of Yugoslavia lost his life because he did not wear his bullet-proof vest.

The king, assassinated last week in Marseilles, owned two bullet-proof vests. He had intended to wear one of them in France as he had done a month before on a visit to Bulgaria.

But when he went ashore from the cruiser Dubrovnik at Marseilles, an admiral's uniform was his garb. The Associated Press learned he put on the bullet-proof vest, then found the admiral's uniform would not fit properly over the coat of mail.

He removed the vest at the last moment and went ashore with a perfectly fitting uniform but without the protection he had planned.

Wheat Export Cut

Australia's Surplus Will Be Less Than Last Year

Rome.—Australia's surplus of wheat for export will be about one-third less than last year, the International Institute of Agriculture estimated.

The institute reported this year's crop at 136,800,000 bushels, as compared with 174,900,000 bushels last year, and the average of 180,400,000 bushels over the last five years. Allowing for a domestic consumption of 55,000,000 bushels, the export surplus will be not much over 80,000,000 bushels.

Fruit For Drouth Areas

Toronto, Ont.—The national relief committee of the United Church of Canada announced it had arranged during the last fortnight for transportation to needy parts of Saskatchewan 40 carloads of Ontario fruit and vegetables. Many of the cars, the committee said, were filled on a community basis.

DOUKHOBORS TO SELL LANDS IN SASKATCHEWAN

Winnipeg.—Peter Vergin, president and chairman of the board of directors of the Christian Community of Universal Brotherhood, Ltd., announced the entire holdings of the corporation in Saskatchewan were up for sale.

Speaking through an interpreter, Mr. Vergin declared he could not at present disclose future plans for the sect in Saskatchewan.

First announcement of the sale came from John McDougall, an advisor to the Doukhobor chief. Bids by tenders were being called for on the property. "They will liquidate their holdings in Saskatchewan," said Mr. McDougall. He said the bids would be received here.

The Christian Community of Universal Brotherhood owns 36,000 acres of land in Saskatchewan and has membership between 6,000 and 8,000 persons. It was believed here many would remain on the land in Saskatchewan while others might move to British Columbia where the brotherhood owns 40,000 acres which is not all being cultivated.

Garnet Wheat Standards

Tentative Grades Passed For Nos. 1 And 2 By Committee

Winnipeg.—Leaving incomplete work to a sub-committee, the Western grain standards committee closed its two-day meeting. Tentative standards were passed for Nos. 1 and 2 Garnet wheat to give the inspection department a basis for grading Garnet separately when the revision in the Canada Grain Act takes effect. These grains will serve until such time as sufficient quantity of Garnet from the 1935 is delivered to permit of new standards being set.

The sub-committee appointed will deal chiefly with the low grade grains all other working having been completed during the meeting. The proposal for two grades of feed grain, because of variation in weight, was among the subjects given the sub-committee.

Dominion-Wide Broadcast

Moose Jaw.—The Philharmonic Society of Moose Jaw will broadcast over the C.R.C. station, C.R.C. 1, on November 18 commencing at 8 o'clock in the evening. The program will be broadcast from St. Andrew's United Church. The Philharmonic Society of Moose Jaw is one of seven Western clubs asked to put on a program for the C.R.C.

Now Science Explains Why So Many People Past 40

Feel That They're Slipping
Losing Their "Grip" on Things

Many people "round 40 think they're 'growing old.' They feel tired a lot... 'weak.' Have headaches, dizziness, stomach upsets.

Well, scientists say the cause of all this, in a great many cases, is simply an acid condition of the stomach. Nothing more.

All you have to do is to neutralize the excess stomach acidity.

When you have one of these acid stomach upsets, take Phillips' Milk of Magnesia after meals and before going to bed. That's all.

Try this. Soon you'll feel like another person! Take either the familiar liquid "PHILLIPS" or the convenient new Phillips' Milk of Magnesia Tablets. Made in Canada.

ALSO IN TABLET FORM:
Phillips' Milk of Magnesia Tablets are not only safe and effective, but also pleasant to take. They are a true relief in the case of indigestion, constipation, and other ailments.

THE NEWS OF STONY PLAIN AND DISTRICT.

Miss Clint, Edmonton, was a week-end visitor with Miss Michael.

Mr Geo Liebert, who has been receiving treatment for pneumonia, is now showing signs of improvement, and hopes are entertained of his ultimate recovery.

Mr Hy Trapp, made a trip to Rocky Rapids district this week and installed a Delco plant.

The local fire brigade was given a run on Friday night, when the old 1922 fire engine was towed down to the water tank at the Armbruster mill and given a short workout.

A Lutheran service in English was held in Stony Sunday Evg by Rev H Kuring. At the close of the service a series of lantern slides was put on.

Lost, license plate 60214 and spare tire and rim, between Hansen Corners and Stony. Return to The Sun Office.

Mr A Lassen, who had been running a dairy farm west of Carvel, left Monday for Quebec, to sail on Canadian Pacific steamship Empress of Britain on Friday for Denmark.

BUTTER AND EGGS WANTED at The Royal Cafe.

Hockey Club Meets.

Members of the Juvenile hockey club held a meeting Tuesday and reorganised for the coming season. Walt Forster was re-elected Pres. and Louie Miller is the new Sec-treas. A committee was appointed to canvass the towns-people for contributions (in specie). Another meeting will be held Friday night at S. P. Motors.

Protection from M.O.s.

Protection for retail merchants of Alberta from mail order houses whose headquarters are in Eastern Canada was asked by A S Mackay, secretary of Alberta Retail Merchants Ass'n, when he appeared before the Alberta tax inquiry commission in Calgary on Monday.

Mr Mackay stated fifteen million dollars was sent out of the Province annually to one mail order house alone, to the detriment of merchants who are paying government taxes of every description.

5. GUNS AND AMMUNITION

THE gun for Skeet is the gun habitually used by the shooter in upland shooting; in other words, the one that fits him. A good Skeet gun is substantially a good one for game birds as well.

Certainly, there is no necessity to spend hard-earned dollars on a new, special gun. If you are starting the game for the first time, and if you have never shot before, and therefore have to buy a gun, pay strict attention to fit, boring, weight, and calibre. Most important of all is to see that your gun fits. Here it is as well to get the advice of some old hand at the game, and also to gain practical experience for yourself by shooting borrowed guns for a while until the right one for you is obvious.

The sight of the gun-rack at a Skeet Club would be an eye-opener to the old, prejudiced trap-shooter. Double-barrelled, single-barrelled, under and over, pumpguns, automatics, all line up together, cheek by jowl. And all the way from 12 gauge

down past the 16s and the 20s to the 28s and the beautiful little .410 gauges, whatever the shooter owns or prefers. In rare instances only is the pump a good gun for the beginner at Skeet, unless he is a wizard at it.

Skeet shooters use anything from trap loads of 7½ shot to 10 shot with good results. The best ammunition is the regulation Skeet load of number 9 double chilled, put up by the manufacturers for this purpose. The use of this load is becoming universal. There is nothing better to give the required density for clean breaks in all gauges and in open guns.

Remember, a good fitting coat or shooting jacket is essential, one that does not bag under the arms. Many Skeet shots are faster than real birds, and no one should handicap himself with a badly fitting garment. Guns have to come up quickly and a little surplus ridge of cloth or buckskin may just throw enough snag in the way to cause you to miss that spinning target.

This is No. 5 of a series of 12 articles on Skeet Shooting. Cut it out. When all have been clipped, you will have a complete write-up of this sportsman's sport which is rapidly becoming the vogue across Canada.

THE TENDERFOOT

By
GEORGE B. RODNEY
Author of "The Coronado Trail",
"The Canyon Trail", Etc.

CHAPTER III.—Continued

Somewhat the Broken Spur always found a market. Broken Spur cattle were shipped periodically to California to be fattened to bring the highest prices in a falling market while the Hour-glass could not pay its freight bills for such shipments. Poor old Joe Carr saw the Hour-glass go to pieces under his once able hands and he sought in vain for the reason. That suit over Soda Springs was the last straw.

"I know damned well they've been robbin' us deaf dumb and blind," he snapped to Bud Crewe, his foreman. "But I can't prove it. What can I do? There's nothin' I can do, Frank."

"Huh. You might try leavin' the cork in that whisky bottle for a change," said Crewe, who was not inaptly named Frank. Carr cursed him and on that occasion left the cork in the bottle . . . for an hour.

"I wish to God I could get track of that young fellow Gerald Keene," went on Carr fretfully. "You know how old Peter Vinton left the Hour-glass. Half to me and half to him and if one of us dies, the other gets the half of the one who dies. Funny way to leave a ranch. Nobody can find young Keene. Nobody knows his address. I've been runnin' into the red ink right along by borrowin' cash to finance the Hour-glass for the last few years. I've been doin' it on my own responsibility. It ain't right that he shouldn't pay his share. . . ."

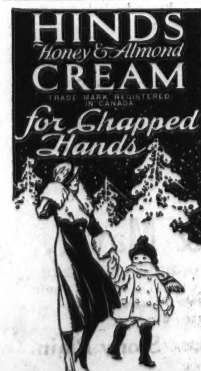

"Listen here, Joe. . . ." Crewe wheeled on his employer. "I've known you for a lifetime as men count years. As a cattle-man nobody can teach you a thing about the business. As a distiller you ain't much but as a steady consumer of bottled goods you ought to have a gold medal. No use blinkin' facts that're right face up on the table. It's liquor that's helped put the ranch in the red. . . . Red liquor. It might have happened anyhow but I know it helped a bad

INDIGESTION?

Then
Try KRUSCHEN
at NO EXPENSE

If you suffer from loss of appetite, indigestion, sour stomach, or miserable feeling after meals there's nothing like Kruschen for relief. The little daily dose of Kruschen first stimulates the flow of gastric juices to aid digestion, and then ensures a complete, regular and unailing elimination of all waste matter every day.

If you suffer, you'll welcome the opportunity to try Kruschen Salt, now positively free of charge. Ask your druggist for the Kruschen Giant Package. This is the Regular bottle, together with a separate FREE TRIAL bottle. Use the Trial bottle first. Then if you are not entirely convinced that Kruschen will do everything claimed for it, return the Regular package unopened to your druggist and he will refund it at full value. But act quickly or your Free Trial Bottle will be gone. Your druggist has only a limited supply.

W. N. U. 2069

Now!...new aid in PREVENTING Colds

Remarkable New Formula is Especially Designed for Nose and Upper Throat where most colds start

AFTER years of research on the problem of colds, Vicks Chemists have developed a remarkable new preparation—Vicks Va-tro-nol. This exclusive Vicks formula is especially designed to aid the functions which Nature has provided—in the nose—to prevent colds, or to throw them off in their early stages. Used at the very first feeling of nasal irritation—just a few drops up each nostril—Va-tro-nol helps to avoid many colds altogether.

Relieves Head Colds at Every Stage

If irritation has reached the stuffy, sneezy stage—Nature's usual warning of a cold is developing—prompt use of Va-tro-nol helps to throw it off in the early stages.

Where irritation has led to a clogged-up nose (a stuffy head cold or nasal catarrh) Va-tro-nol penetrates deep into the nasal passages—reduces swollen membranes—clears away clogging mucus—brings welcome relief.

Va-tro-nol is real medication—not mere "oil drops"—yet is absolutely safe for children and adults. It has been clinically tested by physicians—approved by specialists.

Easy to use, anytime or place—at home or at work. Keep a bottle always handy.

Introduces Vicks Colds-Control Plan

This new aid in preventing colds is the ideal companion to Vicks VapoRub (modern external treatment for colds). Together with certain simple rules of health, these two preparations from the new Vicks Plan for Better Control of Colds. Records of thousands of clinical tests—made over a period of two years, and under medical supervision—indicate that Vicks Plan greatly reduced the number, duration and dangers of colds. (Full details of the Plan in each package of Vicks VapoRub and Vicks Va-tro-nol.)

matter to get worse. It's time somebody's tellin' you."

Carr began a futile protest but Crewe cut him short.

"You'd never have got into that card game in the Silver Dollar but for red liquor. That game cost you ten thousand and you know it. You'd never have tried runnin' a horse for the Conchula. Sweetestake if you hadn't been so full you couldn't hit the ground with your hat. Then you made a bet you'd win it and when you sobered up you wouldn't even hedge. A cattleman's got no business runnin' a horse except at the end of his rope. You know it when you're sober, too. That's what makes me so damned hot."

"I was tryin' to win back what I'd lost," said Carr.

"Hell, man! I know that. A fat chance you had of winnin'! Three strangers actin' in the game and you with the only roll in town with Spike Goddard sittin' in the game and a bar mirror behind you that you never even saw till too late. Man, you were askin' for trouble."

"Well, I got it all right at that. Listen here, Frank. Is there any way I can locate this man Gerald Keene? Can't you think of some way?"

"Simon Burwell of the Drovers Bank in Cato handled the ranch's business didn't he? Better write to him. What's the trouble, Joe?"

"Money," said Carr hoarsely. "I need money, Frank, and that's a fact."

"Can't you borrow enough at the Boco bank to tide you over? Old Pegram, the president there, ought to help you."

"Hell, man! It's old Icthouso Pegram I want to pay. They're yellin' over some back interest that I haven't been able to pay. I borrowed eleven thousand from Pegram on my personal note and I haven't been able to pay him the interest. It's about eleven hundred odd. . . ."

Crewe whistled. "Eleven thousand at ten per cent. (and Texas allowed a ten per cent. rate) meant that old Joe had borrowed about all he could on his share of the ranch at prevailing rates in the money market. No wonder Joe was worried. No wonder he drank a little. Crewe suddenly saw up his mind that never again would be criticized a man till he knew all of both sides of the question.

"That's bad," he said evenly. "But I mean how much is the total you owe?"

Joe Carr flung up a pair of tired

hands that looked suddenly old and frail.

"A damned night, more'n I've got or can raise," he said. "But if that damned Broken Spur'd keep their theivin' hands off me I could yet come clear I think."

"Well, they won't," said Crewe. "This suit over Soda Springs shows they mean to drive you to the wall. That suit'll cost you ten thousand in court fees. If they lose they can't pay. . . . or won't. It'll all come back on us. . . . You. . . . Why not talk with Dustin over the matter?"

"Over an ivory front sight," snarled Carr. "That's the only way I'll talk to him. See if you can't find out where I can get in touch with Gerald Keene. He owns half the ranch. He might help."

But all attempts to find Gerald Keene had failed and at times old Joe doubted whether such a person really existed.

"I don't know what to make of it," growled Crewe, tramping the floor. "The man has just dropped out of sight. Nobody knows where he is or even where he used to live."

"And to-day I was notified that old Pegram wants some definite action taken on my note," said Carr. "That means pay. How in hell can I?"

Crewe whistled again.

"It looks like they've got you by the short hairs," he growled. "If they crowd you, what'll you do?"

"Good God! What can I do?" demanded Carr miserably. He remembered old days when a mere verbal assurance that he would pay would have satisfied the bank but Pegram knew nothing of those days. "I'm too old to start all over again," he said wretchedly. "I can't do it, Frank. Too, there's Edith to be thought of."

There had always been Edith and old Joe Carr had never ceased to think of her though his thoughts were not always sober ones. Crewe could not help reflecting sadly that a few hours of thought about Edith at the proper time, would have prevented much of the present trouble. But he only said:

"There seems to be only the off chance that we may find this man Gerald Keene. Still. . . . Even then I ain't too sure he'd help much. You can hardly expect a man to shoulder half the debts you've incurred on your own sole responsibility. Men don't buy dead horses as a rule."

"Huh. His uncle Peter Vinton would have done it." . . . Carr was desperate. "Peter and me was part-

ners when it meant somethin' to back a man's play. There ain't much hope, even if we find this man Gerald Keene, that he could or would help much but as far as I can see, Frank, it's our only chance. If we can find him, he might be willing to help us out for the full ownership of the Hour-glass. What do you think?"

"Looks to me like you're about right," said Crewe. "Our best hope is to find Gerald Keene."

CHAPTER IV.

"I'm still a-waitin' to hear you tell me how you plan to bring that red-headed girl of Joe Carr's to heel." Spike Goddard poured himself a generous drink and eyed Dustin quizzically across his glass. Dustin continued to stare at him. Words finally came.

"There's a lot more than any girl in this now. You poor fool! Can't

you see as far as the end of your nose? Don't you see the mess we're in? Dad Kane knows enough of what Corse and Gray were doin' up in the hills to put you and me both behind the bars for ten years. . . ."

(To Be Continued)

MAKE YOUR FALSE TEETH HOLD FAST

Eat, talk, sing and shout and never fear embarrassment. Your false teeth stick all day long when you sprinkle on Dr. Wernst's Powder—they fit snugly—comfortably—they can't slip. Prescribed by world's leading dentists—they know it's the best! Costs but little—any druggist.

Said to be the oldest dated optical instrument in the world, a telescope sold recently in London bore the date 1646.

Few Minutes Eases Neuritis Pains Now!

DISCOVERY BRINGING QUICK RELIEF FROM PAIN TO MILLIONS

Remember the pictures below when you want fast relief from pain. Demand and get the method doctors prescribe—Aspirin.

Millions have found that Aspirin eases even a bad headache, a neuritis or rheumatic pain often in a few minutes!

In the stomach as in the glass here, an Aspirin tablet starts to dissolve, or disintegrate, almost the instant it touches moisture. It begins "taking hold" of your pain.

precately as soon as you swallow it. Equally important, Aspirin is safe. For scientific tests show this: Aspirin does not harm the heart.

Remember these two points: Aspirin Speed and Aspirin Safety. And, see that you get ASPIRIN. It is made in Canada, and all druggists have it. Look for the name Bayer in the form of a cross on every Aspirin tablet.

Get tin of 12 tablets or economical bottle of 24 or 100 at any druggist's.

Why Aspirin Works So Fast

IN 2 SECONDS BY STOP WATCH

An Aspirin tablet starts to disintegrate and go to work.

What happens in those seconds at your stomach—Aspirin tablets start "taking hold" of pain a few minutes after taking.

SAVE MONEY by buying a new Chevrolet now? Yes... and in five different ways!

First: Chevrolet offers the lowest prices in Canada. It costs less to own this car from the very outset.

Second: Time-payment prices are lower now than ever—thanks to new, low G.M.A.C. rates.

Third: We can allow more in trade for your present car—because we have a waiting market for good used automobiles.

Fourth: Your new Chevrolet will cost you less to run than any other car. Less for gasoline—less for upkeep—as long as you drive it!

Fifth: Chevrolet offers you the five most-talked-about features of the year. You get more for your money in a 1934 Chevrolet!

And think of the time, trouble and worry you'll save—driving a new, safe car with new tires, new brakes, new battery, safety glass, dead-tree steering and lots of "pick-up"!

NEWS BRIEFS.

Alan Monkhouse, British engineer who figured largely in the sensational Soviet treason trial of 1933, charged with plotting against the 5 Year Plan, would like to take another look at the Soviet Union, if permitted, he told ship reporters on arrival aboard the Duchess of York recently.

An interesting Canadian book has just been published by Macmillan. It is titled "And Slips—and Sealing Wax" and recounts the adventures of a Canuck newspaper man who cruised round the world in O.P.R. liner Empress of Britain. A.M. Irwin, a Montrealer, is the writer. Text and illustrations present many of the strange customs and funny people encountered by a world traveler.

The suggestion made by E.W. Beatty, Pres. C.P.R., that country along the Northern Alberta Ry. should be colonized has met with the strong approval of Peace River Board of Trade, who sent a resolution to that effect recently to Mr. Beatty.

Business leaders of Winnipeg, railway officials and friends of D.C.

Coleman, senior Vice-Pres. of C.P.R., gathered at the railway station of the Manitoba metropolis to bid him farewell when he left for Montreal recently to assume his new duties. The official send-off followed a week of functions in honor of Mr. Coleman's promotion after 16 years' service in the com-

pany's western lines at Winnipeg. Thousands of entries poured in to The Most Beautiful and Largest Maple Leaf competitions recently conducted from coast to coast by Canadian railways. \$110 was offered in prizes. Outstanding Canadian artists served on the judging committee.

First Street, Stony Plain.

The Nasonic Dance.

The Worshipful Master and Brethren of Meridian Lodge and their friends had an enjoyable time at the invitation dance held last Friday night. Those present danced until midnight, when all adjourned to Masonic hall, where a choice lunch was served; following which dancing was resumed. Barths supplied the music. A large party of City guests attended the affair.

Sale of Dairy Cattle.

Having decided to dissolve partnership, Lassen & Villadsen, who have been conducting a very successful dairy farm near Carvel, have authorized Mr. M. Zuht to conduct a clearance sale of their dairy herd of purebred Holsteins on Tues. Oct. 30. This is one of the choicest herd of dairy cattle which has been offered for sale in these parts for years, and should attract the attention of those who are in the market for guaranteed milkers.

Warning to Poultryers.

A warning to farmers and others, issued by the RCMP Commissioner of K Division is to the effect that during the Christmas season complaints often arise from farmers who, in response to press advertising, mail circulars etc., have forwarded consignments of turkeys and other poultry to firms in various large cities in Canada.

Usually exceptional prices and attractive inducements are offered, but the ultimate result is that the farmer receives practically nothing in return. New firms arise and others have a change of name each year for this class of trade, thus creating a problem of enforcement bodies which is hard to cope with.

Those having poultry to sell should deal only with those firms which have an established reputation, as these people are usually giving the best market price which can be obtained.

Calendar.

26—Dance, Holborn Hall
29—Ph. Trautman's Auction Sale
30—Lassen & Villadsen Auction.
31—Hallowe'en entertainment at S. P. H.
NOVEMBER.
2—Dance, Kelly's Hall.
12—Remembrance Day.

Tuesday's Chicken Banquet.

The chicken feast held at Kelly's Hall Tuesday was a great success, a record crowd of chicken-dinner fanciers being seated at the festive board. The chicken served was delicious, as also were the balance of the interior decorations.

Dedicating the Inglenook.

Herr Albert Wurtz (no relation to G.&W.) on Saturday performed the ceremony of dedicating the Inglenook at his picturesque bungalow on Cobblers' Row. On retiring from an active business career, Herr Albert has chosen one of the town's beauty spots in which to erect his abode, and he has been receiving the congratulations of his friends of the fine appearance which his architecturally correct structure presents.

Notice to Creditors and Claimants.

IN THE ESTATE OF PHILANDER SMITH WASHBURN, late of Stony Plain, in the Province of Alberta, Farmer deceased:

NOTICE IS HEREBY GIVEN that all persons having claims upon the estate of the above named Philander Smith Washburn, who died on the 3rd day of February, 1933, are required to file with the undersigned, Solicitor for his Executors, by the 15th day of December, 1934, a full statement duly verified of their claims and of any securities held by them, and that after that date the Executors will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

DATED this 23rd day of October, 1933.

JAS. MALLOCH,
